

# **This is my first slide**

- It has, of course, items in it
  - More than one item
1. Numbered lists, too

## This is my second slide

rst2pdf can display code nicely:

```
for x in range(7):  
    print "cute!"
```

# This is my third slide

Also, you can use math!

$$\frac{2 \pm \sqrt{7}}{3}$$

That is *not* an image.

# **This is my 4th slide**

Other features include:

- Images, including SVG
- Tables
- Font embedding (Type1 and TTF)
- Extensible
- Background (like this one)
- Page transitions
